

CLIENT QUOTES

Wheaton Detailing Service has furnished fabrication drawings for many of my projects over the last 25 years. I have always found them to be accurate, on time, and within budget. They not only work with me but also with my customer to define the scope and intention of their customer. This is one of the most important services any vendor can provide. It's been an absolute pleasure to work with Andy and Jim on past projects, and I look forward to working with them in the future.

In the fifteen plus years that Wheaton Detailing has provided shop details for Sefton, we have come to trust their workmanship without question. Their attention to accuracy, neatness and timeliness are a major factor in our successful completion of many projects and in turn numerous repeat customers. From large tonnage to small maintenance projects we can rely on Wheaton Detailing every time.

WHO WE ARE

Wheaton Detailing Service, Inc., is a group of steel detailers offering complete shop and field drawings for structural steel fabrication. Established in 1986, the company is located just north of Houston, in Spring, Texas. Wheaton specializes in all facets of structural steel detailing. To meet the engineering and fabrication needs of the industry, Wheaton's detailers use a combination of the latest technology and traditional drawing methods in order to produce complete and precise details. During the checking phase, Wheaton's experienced checkers use both automated detailing software, such as SDS/2, and proven procedures to ensure that the quality of each drawing is not compromised. Wheaton is dedicated to offering excellent performance, a quality product, and unparalleled service to their customers.
